Holly Springs VFD – Tanker 9262
1,800 gallon Tanker
Springville, Alabama

Facts and Figures...

- Tanker 9262 is a 1995 tanker operated by the Holly Springs Volunteer Fire Department located in central Alabama.
- The rig is built on a GMC chassis and is powered by a diesel motor.
- Tanker 9262 carries 1,800 gallons of water and has a 250 gpm Hale pump.
- It is equipped with a 10-inch rear dump and a 4-inch direct fill line.
- The tanker also carries a 2,000-gallon dump tank.
- The Holly Springs VFD, along with several other fire departments, protect the small town and rural areas of St Clair County, Alabama.

Holly Springs Tanker 9262

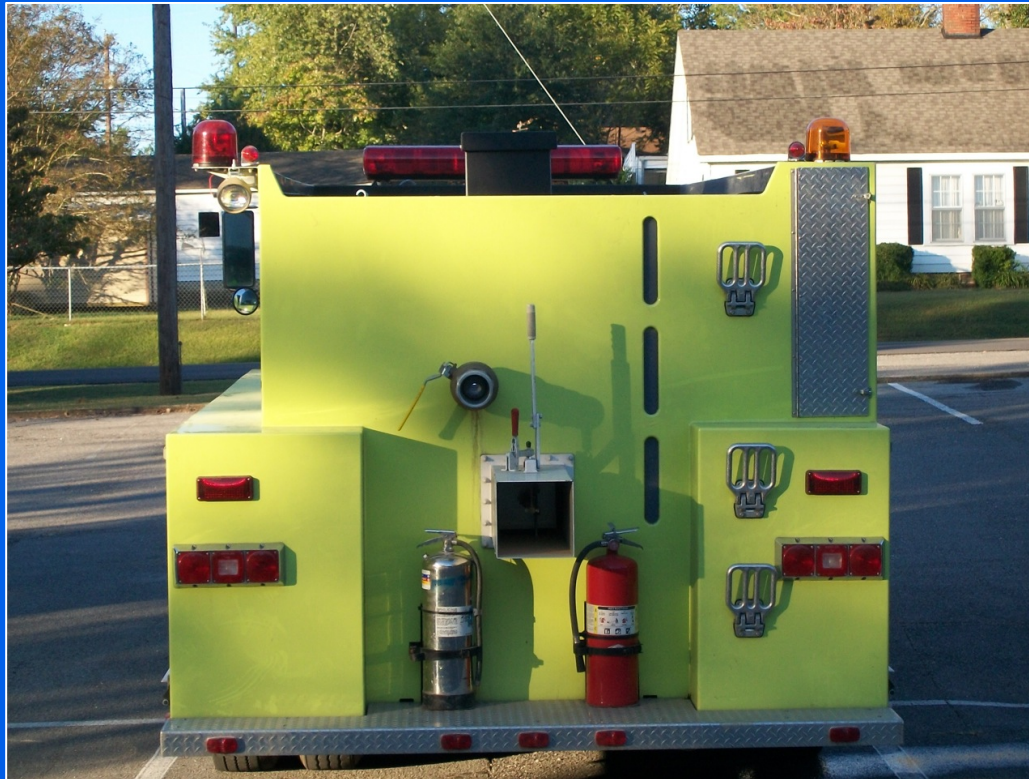

Tanker 9262 is set up to operate as a water hauling unit in a tanker shuttle operation. It has a 250 gpm pump for small scale operational support such as brush/woods fires.

Holly Springs Tanker 9262

The pump is a small Hale pump that has a separate engine drive and very simple controls.

Holly Springs Tanker 9262

The tanker has a simple rear end as well – a 10-inch dump, a 4-inch direct fill, and a compartment for the 2,000-gallon dump tank.

Holly Springs Tanker 9262

The tanker's short wheel base makes it a nice fit for the windy, rural roads of the Holly Springs' response district.

Holly Springs Tanker 9262

Tanker 9262 is shown above dumping its water at a 2010 water supply drill in nearby Remlap.

Holly Springs Tanker 9262

The 4-inch direct fill is equipped with a Cam Lock fitting for quick turnaround time at the tanker fill site.
