Indian Ford Fire District – Tanker 830  
2,000-gallon Tanker  
Bessemer, Alabama

# Facts and Figures...

- Tanker 830 is a 2012 KME tanker operated by the Indian Ford Fire District in Bessemer, Alabama.
- The rig is built on an International chassis and carries 2,000 gallons of water.
- The tanker is equipped with a 750 gpm Hale PTO-driven pump, 10-inch side and rear dumps, and carries a 2,100-gallon dump tank.
- Tanker 830 was purchased using federal grant funding.
- The Indian Ford Fire District helps to protect the rural and suburban areas around Hoover and Bessemer, Alabama.

# Indian Ford Tanker 830

This short wheelbase tanker works well on the narrow back roads that are found throughout the fire district.

# Indian Ford Tanker 830

The 750 gpm Hale pump is PTO driven and allows the tanker to support a “nurse tanker” operation if needed during the early stages of fire attack.

# Indian Ford Tanker 830

The tanker has 10-inch side and rear dumps and dual, 2-1/2-inch direct fill lines using Fireman's Friend Valves.

# Indian Ford Tanker 830

Tanker 830 carries a 2,100-gallon dump tank and is shown here getting ready to offload its 2,000 gallons of water at a drill in Shelby County.
