

Big Water Rigs

**1970 Karmac Pumper
Moscow, Russia**

Facts & Figures...

- While this might not be such a big water rig, we found it interesting.
- A fire chief friend of ours took the photos while on a trip to Moscow three years ago.
- The rig pictured is a 1970 Karmac fire engine. We are not sure what size pump or tank it has but it apparently is representative of the type of rigs currently in use today.

Karmac Pumper

Looks like the pumper has seating for four or five and carries some fire fighting equipment in compartments and overhead.

Karmac Pumper

The crew is refilling the rig – perhaps after a fire. Looks like they are using a special hydrant device – we believe this to be one of those recessed-style hydrants commonly found in Europe.
