

## 8-hour Water Supply Officer Seminar

*“The role of Fire Department Water Supply Officer is an important one because every fire department and community relies on the adequate availability of water for fire suppression needs.”*

Our 8-hr Water Supply Officer Seminar covers the duties and responsibilities of the Water Supply Officer in both the emergent and non-emergent setting. Topics covered include:

- ISO water supply requirements
- Municipal water supply systems
- Alternative water supply systems
- Testing and inspection of water supply system components
- Water supply vehicles
- Water supply pre-planning
- Water Supply Group (Officer) function in ICS
- Water supply fireground operations
