Operations

Portable Monitor
Supplied by 5-inch LDH
Corpus Christi, TX

A Big Attack Line

This TFT Crossfire portable monitor flows 1250 gpm and is fed by a single, 5-inch LDH line.

A Big Attack Line

A simple loop with a an anchor strap is all that is needed to secure this big line.

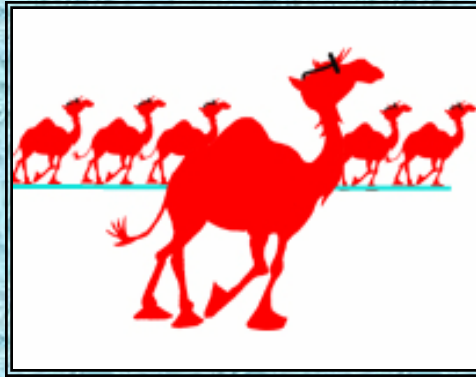

How much flow?

The pressure gauge reads above 100 psi, thus we know that the automatic nozzle is fully-open and flow has been maximized at 1250 gpm.

Facts & Figures...

- The Refinery Terminal Fire Company of Corpus Christi, Texas are masters in the art of big water flow in the industrial fire protection field.
- All of their rigs are set up to lead off with a portable monitor fed by a 5-inch supply line.
- This set-up allows the crews to quickly deploy a 1000+ gpm line in order to start protecting exposures or cooling exposed steel.
